

Vendor Gamma - Historical Assessment

Prior NFS Vendor Risk Record

Organization: Northstar Financial Services (NFS)

Classification: INTERNAL - TRAINING

Effective date: September 2026

Summary

Document automation SaaS assessed in 2026. Overall risk: MEDIUM. Decision: CONDITIONAL APPROVAL.

Key findings

The vendor met encryption and identity requirements. SOC 2 evidence was missing from the assessment package and recorded as UNKNOWN. A temporary pilot using Internal data only was allowed while evidence was obtained.

Lesson learned

Missing evidence is UNKNOWN, not PASS. Scope restriction can sometimes enable a controlled pilot without approving higher-risk data processing.
