

Vendor Alpha - Historical Assessment

Prior NFS Vendor Risk Record

Organization: Northstar Financial Services (NFS)

Classification: INTERNAL - TRAINING

Effective date: September 2026

Summary

Cloud analytics vendor assessed in 2025. Overall risk: MEDIUM. Decision: CONDITIONAL APPROVAL.

Key findings

Security controls were satisfactory, but the vendor's initial incident-notification commitment was 72 hours. Contract negotiation reduced this to 24 hours. Production use was approved only after the amendment.

Lesson learned

Contractual remediation can convert some policy gaps into acceptable residual risk when the vendor can meet the mandatory requirement before go-live.
